Forecast for Friday 31 Dec 2021

Weather: Occasionally heavy overnight rain clearing towards dawn then becoming brighter with some sunny spells developing. Cloud increases again across western parts through the evening, bringing a risk of patchy rain and drizzle.

Chance of cloud free mountain/hill tops above 600m: Little chance at first, and again in the west during the evening, otherwise around 75% through much of the day.

Visibility: Periods or persistent cloud above 450-600m at first, and again in west in evening, soon lifting and breaking to become occasional above 600m. Away from cloud visibility very good falling to several kilometres in rain and drizzle.

Forecast for Saturday 01 Jan 2022

Weather: Cloud and outbreaks of rain clearing through the early hours with long clear spells developing. Then a bright start with some good spells of sunshine with just a few showers expected through the afternoon.

Maximum wind: Southerly or southwesterly 25mph, gusts around 45mph over higher summits, through daylight hours, but winds a little lighter at first and again in evening.

Chance of cloud free mountain/hill tops above 600m: Around 75%, but nearer 40% in the west during the afternoon.

Visibility: Occasional, becoming periods in the west during the afternoon, cloud above 600m. Away from cloud visibility very good falling a little in showers.

Temperature: **Valleys:** Around plus 8 or 9 Celsius at dawn rising to plus 13 or 14 Celsius by day
At 600m: Around plus 8 or 9 Celsius
Freezing level: Well above the summits
